Embodiments of the present invention claim priority from Provisional  
Application Serial No. 60/152,785, filed September 3, 1999, and are related to U.S. utility  
patent applications entitled "License Management System And Method With License  
Balancing", Attorney Docket No. 230074.0228, filed \_\_\_\_\_; "System And Method For  
Selecting A Server In A Multiple Server License Management System", Attorney Docket No.  
230074.0229, filed \_\_\_\_\_; and "License Management System And Method For Commuter  
Licensing", *serial number 09648502* ~~Attorney Docket No. 230074.0230~~, filed *1/25/2000*. The contents of each of these  
applications are incorporated by reference herein.

**Background of the Invention**

1. Field of the Invention

The present invention relates, generally, to license management systems and  
processes for managing licenses on a computer network and, in preferred embodiments, to  
such systems and processes involving a pool of license servers for managing software licenses  
among one or more users on the network.
